## **SCHAFFNER'S NEW POWER QUALITY BROCHURE OUTLINES BENEFITS OF ADDING POWER QUALITY SOLUTIONS TO ITS EMC COMPONENTS BUSINESS**

**EDISON, N.J., January 2007** -- Schaffner EMC, a leading provider of EMI/RFI components and solutions for power quality, has just published a new brochure on its power quality capabilities, and how these new solutions compliment its EMC/EMI components business.

With the acquisition of Jacke Transformer GmbH in October of last year, Schaffner has combined its leading expertise in EMC/EMI filtering offerings with Jacke's power quality solutions to become the only company to offer that unique combination of products and services. Schaffner's new brochure details its extensive product offerings in both power quality and ECM/EMI components. It also provides background information on the power quality industry, including why power quality is important and what some of the key issues are in the industry.

In the 12-page brochure, Schaffner outlines factors, such as its know-how, global presence, short lead times, optimized processes and competitive costs that make up its methodology. The brochure also touches on the importance of the company's worldwide reach and ability to customize standard solutions to meet various application-specific needs, regardless of geographical location.
